

VERTIGO

Our experienced doctors diagnose and treat a broad range of ear, nose, and throat conditions in both adults and children. As sub-specialists, they can focus their expertise on a specific aspect of ear, nose or throat health to give you the best care possible.

Doctors at Columbia Asia Hospital, provide the entire range of otolaryngology services to patients which include sophisticated, minimally invasive surgery.

Ear and hearing problems can be very serious conditions that you should not take lightly.

If you suffer from one or more of the following symptoms, contact the Ear and Vertigo Clinic, Columbia Asia Whitefield to schedule an appointment with one of our surgeons:

Patients with symptoms of balance disorders will be evaluated by a ear, nose and throat specialist by extensive history taking and examination followed by:

Comprehensive vertigo assessment – Neuroequilibrium team at Columbia Asia Hospital Whitefield

- ❖ Audiogram whenever applicable
- ❖ HRCT Temporal bone if indicated
- ❖ Cross references with neurologist or cardiologist

Treatment will be a multimodality approach which will include medical / surgical and vestibular rehabilitation with exercises, with regular follow up for the best possible clinical outcome for the patients.
